

Environment Policy

Protecting the environment is our fundamental duty towards life. At every juncture, we remain conscious of our responsibility to sustain our planet. At UPL, we strongly believe in and are firmly committed to monitoring, improving environmental performance, preventing pollution, and protecting the environment.

To establish a strong and sustainable environmental management system across our entire value chain, we commit to the following:

- Adopt science-based approach towards sustainability and cover 100 percent of our operations under sustainability and environment management policy.
- Implement the code of practices of Responsible Care initiative to achieve international benchmark in pollution prevention.
- Comply with all applicable statutory and other requirements pertaining to Environmental Management System (EMS) as well as make necessary improvements to go beyond compliances.
- Follow the international environmental policies, best practices, efficient technologies to improve our environmental performance.
- Utilize natural resources to meet the need of the present without compromising the need of future generations.
- Conserve natural resources by their responsible use and achieve reduction in our environmental footprint.
- Ensure zero harm to biodiversity in our operating areas.
- Create culture of practicing environmental management system, procedures among employees.
- Promote environmental awareness among employees & community.
